

Products

Protect your landscape investment the organic way.

EXSEED® Compost and proprietary organic EXSEED® Soil give you the foundation you need for a healthy landscape that requires less maintenance and is naturally pest and disease free. Whether you are planning an entire sustainable organic landscape or are just interested in improving the health of your existing lawn or garden, EXSEED® Soil Products has the solution for your landscape soil needs.

EXSEED® Compost

EXSEED® Compost is a premium natural compost product that is ideal for all your landscaping lawn and gardening projects. Made from 100% recycled yard trimmings, our screened and organically balanced compost is an ideal source of organic matter for any soil from heavy clay to sandy conditions. EXSEED® Compost has excellent water retention characteristics that can help improve drought tolerance in almost any setting and reduce overall watering requirements.

Uses:

- General soil amending for lawns, flowers, vegetable gardens, trees and shrubs.
- Topdressing for turf maintenance and renovation.
- Backfill mixes for planting trees, shrubs or flower beds.
- Potting soil amendment for container plants and flower boxes.

Benefits:

- Increased water retention.
- Improves soil cation exchange.
- Increases root depth.
- 100% natural.
- Promotes natural microbial balance.
- Fine screening.

Other Services

Custom Soils

Our exclusive EXSEED® Topsoil blend has been optimized for turf and landscaping requirements in the northeastern U.S. and is best used for lawns, gardens, trees/shrubs and planting beds. We will gladly work with you to create custom soil blends for urban environments, wetlands, golf courses, athletic fields and even green roof installations. We can customize mixes for almost any drainage, nutrient or pH requirement.

Please contact us for more information on our custom soils.

Mobile Topsoil Screening

We offer full mobile screening services for the processing and reuse of existing soil and rock on site. Depending on the needs of the homeowner or contractor, we can arrange the off-site removal of screened debris and excess soil. With fast setup time and ability to locate almost anywhere on your site, we can quickly and efficiently screen your soil where you need it. Combined with EXSEED® Compost, your existing topsoil can be made into a rich and nutrient balanced soil without the added expense of moving and disposing of your existing material.

Please contact us for a mobile screening estimate for pricing, availability and capacity.
